Anas Muhammed Rushdi Tilika

Nationality: Thailand **Phone:** +966 546563094 **Email**: a7nas.talika@gmail.com
GitHub: anas-roshdi **LinkedIn:** anas tilika **Portfolio:** Link

Objective

Enthusiastic Computer Science graduate (Excellent with First Honors) with strong proficiency in mobile application development (React Native) and software engineering. Looking to leverage my practical experience in problem-solving, UI/UX design, and application architecture to build scalable, user-centric solutions in a professional and dynamic environment.

Education

Bachelor of Computer Science
University: UMM-ALQURA UNIVERSITY
Graduation Year: 2025
GPA: 3.84/4.00 and overall grade Excellent with first honors

Technical Skills

- **Programming Languages:** Java, JavaScript, TypeScript ,Python, HTML, CSS.
- **Libraries & Frameworks:** React Native, React.js, Redux, Context API, Node.js, Express.js, scikit-learn, Pandas, NumPy, Matplotlib, Tkinter.
- **Back-End Tools:** RESTful APIs, JSON Web Tokens (JWT), Express-Session, Axios.
- **Databases:** MySQL, Oracle , SQLite.
- **Development:** Web Applications (Front-End & Back-End), Desktop Application Development, Google Play Console, Version Control .
- **Concepts:** OOP , Machine Learning, AI Applications , Data Visualization, Predictive Analytics, Asynchronous Programming .
- **Soft Skills:** Problem-Solving, User Interface Design.

Projects

Lammeh - Social Party Game (Google play link) (Codes link)
Technologies: React Native, TypeScript, SQLite, EAS Build, Google Play Console, Git.
- Developed an offline multiplayer social deduction game for Android, and managed the complete app deployment lifecycle, from version control with Git to EAS building and Google Play Console submission.

Quran Journey App (In Progress) **(Codes link)**
Technologies: React Native, TypeScript, JSX, Git.
- Currently developing a comprehensive educational mobile app featuring role-based dashboards, interactive learning modules, dynamic memorization roadmaps, and a scalable front-end architecture.

Devo – AI-Powered Business Management System **(Download)** **(Codes link)**
Technologies: Python, Tkinter, SQLite, Pandas, scikit-learn, Matplotlib, Git , PyInstaller, Inno Setup.
- Engineered a desktop accounting app featuring an adaptive AI parser that converts raw WhatsApp orders into structured invoices and packaged a standalone Windows installer using PyInstaller and Inno Setup.

Smart Attendance System (Graduation Project) **(Codes link)**
Technologies: NFC, Java, Database
- Developed an advanced Near Field Communication (NFC) system to automate student attendance.

Plant Shopping **(Live demo)** **(Codes link)**
Technologies: React.js, Redux/Context API, JavaScript (ES6+), CSS3
- Built a responsive e-commerce app featuring a dynamic cart and real-time price calculations.

Certifications & Online Courses

- Machine Learning Foundations: A Case Study Approach
- Machine Learning: Classification
- Developing Back-End Apps with Node.js and Express
- Developing Front-End Apps with React
- Version Control
- Introduction to Cloud Computing

Languages

Arabic: Native
English: Intermediate
